

Protect your birds from Heat Stress

Use **ION⁺**

THE ELECTROLYTE SOLUTION

Maintain

Metabolic rate
Feed intake
Body fluid levels

Corrects

Electrolyte balance in body fluids
Overcrowding stress
Environmental stress

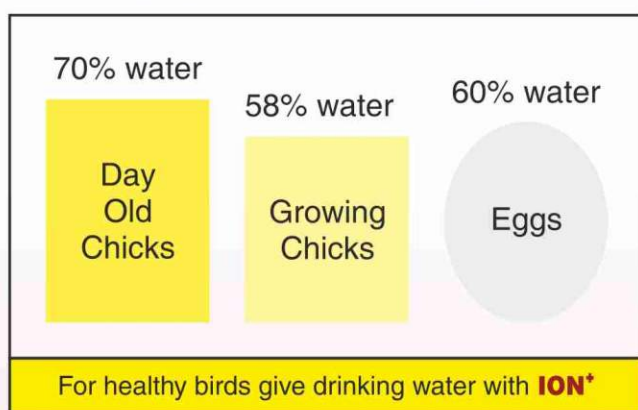

ION⁺Protects Your Flock

ION⁺

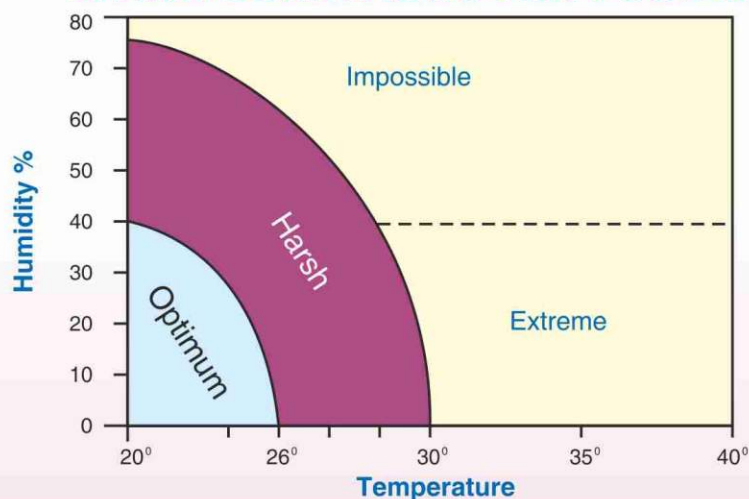

Anti - Summer, Water-feed Supplement for Poultry

At 40°C, 25-30g of moisture is lost per bird per hour. For each gm of water evaporated from the lungs at an atmospheric temperature of 40°C, approx. 574 calories are lost. and if the environmental temperature goes upto 43°C, it is difficult for the birds to survive exposure of more than 3 hours.

WATER AS PERCENTAGE OF B.WT

LIVING CONDITIONS FOR POULTRY

ION⁺ - contains balanced quantities of Electrolytes - Sodium Chloride, Magnesium Chloride, Calcium Chloride, Sodium Acetate, Potassium Citrate, Sodium Citrate & Dextrose

BENEFITS :

- ☂ Maintains Electrolyte Anionic and Cationic balance in the body fluids during
 - ✓ heat stress
 - ✓ diarrhoea
 - ✓ sudden changes in temperature
 - ✓ dehydration
- ☂ Supports early recovery and reduces periods of low productivity during disease and metabolic disorders
- ☂ Stimulates appetite and improves vitamin assimilation.

FEEDING SUGGESTIONS :

Chicks / Growers / Layers / Broilers : 2ml / lit of drinking water
Calves & Cows : 500ml to 1000 ml or more,
depending on size
Dogs & Cats : 80ml per kg of b.wt. 3 times daily

PRESENTATION : 500 ml bottles, 5 Lit. & 25 Lit. jars
