

Maxi Guard

A COMPLETE DISINFECTANT

Virucidal • Mycoplasmicidal • Bactericidal • Fungicidal

BROAD
SPECTRUM
SAFE AND
BIO DEGRADABLE

Maxi Guard

A WIDE VARIETY OF APPLICATIONS

Due to its broad spectrum activity and safety of use, Maxi Guard is recommended in the following areas:

RECOMMENDED USAGE

AQUA FARMS

For routine use : 500ml to 1 Lit/Acre (1 meter depth)
Contact your Aqua expert for specific usage.

ANIMAL HOUSING and FARMS

- Poultry Farming: Breeder farms, Layers, Broilers, Hatcheries
- Dairy Farms
- Others: Horse stables, rabbit farms, kennels, catteries, camel stables ○ Pig - sty

Routine Disinfection

Preventive use with out any specific disease spray 1 litre of MaxiGuard diluted in 200 litres of water to cover 600 square metres area.

Biosecurity Uses

Preventive use without any specific disease 1 litre of Maxi Guard diluted in 200 litres of water. in Foot bath and wheel bath etc.

Terminal Disinfection

Dilute 2.5 litres of Maxi Guard in 2.5 litres of water. Use this solution of 5 litres for 1000 cubic meters.

PACKING
1 litre Bottles and
5 litre jars

Admn off. :
VIRGO NUTRIENTS
201/A, Maruti Chambers, Fun Republic Lane,
New Link Road, Andheri (W), Mumbai - 53.

Maxi Guard

Proven Efficacy
against all
major pathogens

WHAT IS Maxi Guard?

Maxi Guard is used effectively as disinfectant against 4 major pathogen families, viz. **virus, mycoplasma, bacteria and fungi**, even in the presence of organic materials and hard water.

MaxiGuard has the following composition :

Alkyldimethylammonium chloride
Octyldicyldimethylammonium chloride
Didoctyldimethylammonium chloride
Didecyldimethylammonium chloride
Glutaraldehyde
Pine oil
Terpineol

HOW IT WORKS ?

Quaternary ammonium

Effective on coated viruses, Gram+ve and Gram-ve bacteria, bacterial spores, mycoplasma and fungi

Glutaraldehyde

Broad spectrum efficacy including Gram+ve and Gram-ve bacteria, bacterial spores and naked viruses (parvovirus, entero-virus)

A Synergistic Action

The association of quaternary ammoniums and glutaraldehyde allows to extend the respective spectrum of each of the components and to reach all bacterial, fungic and viral targets even in the presence of interfering organic matters.

FEATURES

- * Very strong wetting power
- * High Stability
- * Good Chemodegradability
- * Active in hard water and in presence of organic matter

BENEFITS

- * Greater penetration and higher efficacy
- * Available for long periods for action
- * Safety for consumers and environment
- * Excellent results in all types of Water
- * Safe for animals

Maxi Guard

The Ideal
DISINFECTANT

EFFICACY

Broad Spectrum Activity : Virucidal - Mycoplasmicidal - Bactericidal - Fungicidal

Strong Penetration Power : Wetting and detergent because of a high concentration of tension-active agents.

SAFETY

Non-toxic for animals. **Contains No phenols and No formaldehyde.** Non irritating at the recommended dilution rates. Does not attack the mucous membranes of the skin.

Convenient To Use : Can be used with all systems:-Spraying, dipping etc.

Maxi Guard can be used after any detergent after rinsing of surfaces

Maxi Guard can be applied before the use of insecticides of pyrethroids family

No corrosive action: Safe for equipment and building
