

# Turbogel

*The True Feed Binder And Attractant*

With **Turbogel** Binder A Good Feed Assures Better Performance

Shrimp feed must be formed into particles or pellets that are strong enough to withstand normal handling and shipping without disintegrating. **Binders are an important feed additive to meet these requirements.**

## KEY ISSUES:

- Modern and intensive system of fish and prawn farming demand extra nutrients for healthy performance
- 40% to 100% vitamins may be lost in pelleted feeds
- Administration of vitamins / medicines through feed is more dependable

## THE SOLUTION :

**Turbogel THE SMOOTH GEL WITH A FIRM GRIP AUGMENTS AVAILABILITY OF NUTRIENTS ...**

# Turbogel

*The True Feed Binder And Attractant*

Unsurpassed Benefits Of **Turbogel**

## **Turbogel is efficient**

- ✎ Limits breakage of pellets and minimizes leaching of water soluble nutrients.
- ✎ Improves water durability of feed upto 6 hours.
- ✎ Provides efficient binding for medication and extra nutrients.

## **Turbogel is safe**

- ✎ Does not disturb pH of feed and water.
- ✎ Turbogel is non-greasy, does not create barrier between water surface & environmental air.

## **IMPROVES FCR • INCREASES PRODUCTIVITY**

### **Turbogel is convenient to use**

- ✎ Easy to mix uniformly
- ✎ Small and convenient dose
- ✎ No wastage, maximizes utilization

### **Turbogel Mixing Rate**

- ✎ Mix 5-10gm of Turbogel with 1kg pellet feeds for uniform coating. Shade dry and broad cast.

### **Packing**

1kg jar; carton of 1kg x 9,  
5kg jar; carton of 5kg x 2  
and 10kg bucket.
