Prorich

Profits from your Pond

Special synergistic blend of essential microbial strains for rapid degradation of organic matter. The microbial cultures accelerate and facilitate Bio degradation and cleaning of pond water and bottom to offset pollution.

The microbial cultures multiply and arrest the growth of pathogen load by competitive inhibition.

Unique techno formulation, **multifaceted trials confirm performance.**

Controls vibrio

Colony count reduction - healthy pond.

Reduces
Hydrogen Sulphide

upto 97.80%

Reduces
Ammonia

upto 57.15%

Reduces
Nitrates

upto 96%

Improvement in FCR | Improvement weight gain | Improvement Survivability (+)

Regular use of **PRORICH** in your ponds leads to following

Moulting - Regular

pH - No Change

Feeding - Normal

Salinity - No Change

**Alkalinity - No Change,
stabilized**

Water hardness - Stabilized

Diatoms increase - upto 50%

Plankton density - Optimized

**Pond bottom - Improves towards
normal brown soil**

**Water Quality - Improves towards
golden green**

ACTIVE INGREDIENTS :

- Bacillus Subtilis
- Bacillus Licheniformes
- Bacillus Polymyxa
- Bacillus Megaterium
- Nitrosomonas
- Nitrobacter
- Saccharomyces and
- Enzymes

ADVANTAGES OF PRORICH :

- Prorich helps eliminate toxic gases like H₂S, NH₃ (Nitrite & Nitrate etc.) from the pond environment.
- Prorich stabilizes pond water pH .
- Prorich prevents the growth of undesirable and pathogenic bacteria.
- Prorich maintains water and pond bottom quality.
- Prorich maintains water colour by stabilizing phytoplankton.

SUGGESTED USAGE : In Aqua pond of one meter depth.

Before Stocking : 350-500 gm/acre.

During Culture : 150-300 gm/acre/once a week, every week.

Avoid using antibiotics or chemical disinfectants when using Prorich

PRESENTATION : Pack of 500gm
