

Betalife

Beats heat stress

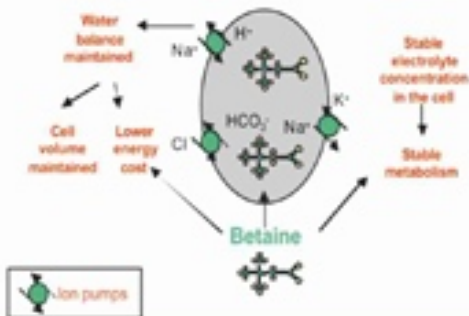

Betalife a blend of four crucial components to combat heat stress:

Betalife with organic osmolyte betaine reduces body cell dependence on energy for ion pump, thereby saves energy (upto 5%) for growth & production

Retains correct cellular water balance in the body, helping birds to tolerate high ambient temperature

Reduces heat stress induced increased body temperature

Reduces panting rate

Betalife's electrolytes comprises maximum number of monovalent ions with high coefficient of absorption for better performance

Maintains optimum Dietary Electrolyte Balance (DEB)

Maintains acid base balance in body

Prevents dehydration

Betalife formulated with Menthol: Stimulates oral mucosa sensory cold receptors & provides a cool sensation in birds

Gives a very pleasant 'Soothing' sensation of 'freshness'

Betalife fortified with Dextrose & monovalent ions provides quick relief during heat stress conditions by promoting rehydration & recovery

Supplementation Rate:

Heat stress	1 ml/ 1 liter of water (1 liter/1000 liter)	3-5 days
Extreme hot climate	2 ml/ 1 liter of water (2 liter/1000 liter)	3-5 days
Chick arrival at farm	1ml/1 liter of water (1 liter/1000 liter)	
Vaccination stress (A day before vaccination)	1 ml/ 1 liter of water (1 liter/1000 liter)	1 day
Transportation stress	1 ml/ 1 liter of water (1 liter/1000 liter)	3 days

Betalife improves egg shell weight & thickness

Betalife

Beats heat stress

Presentation:
1 liter, 5 liter
& 25 liter

The osmotic protector with **25% Betaine**,
Fortified with **Electrolytes, Menthol & Dextrose**

Betalife

- ▶ Reduces heat stress induced increased body temperature upto 3%
- ▶ Reduces panting rate upto 18.4% per minute
- ▶ Reduces mortality significantly
- ▶ Provides instant source of energy
- ▶ Helps birds keep cool and relaxed in summer &
- ▶ Improves appetite
